Volume 123 October 1982

CONTENTS

Experiments on the role of amplitude and phase modulations during transition to turbulence. R. W. Miksad, F. L. Jones, E. J. Powers, Y. C. Kim and L. Khadra *page* 1

Rising bubbles. Michael J. Miksis, Jean-Marc Vanden-Broeck and Joseph B. Keller 31

Stability of circular Couette flow with variable inner cylinder speed. G. P. Neitzel 43

Path-integral methods for turbulent diffusion. I. T. Drummond 59

On the spreading of a tubulent spot in the absence of a pressure gradient. I. Wygnanski, M. Zilberman and Joseph H. Haritonidis 69

The forced mixing layer between parallel streams. D. Oster and I. Wygnanski 91

Dispersion of tracers in the deep ocean. Ronald Smith 131

Transition from regular to Mach reflection of shock waves. Part 1. The effect of viscosity in the peudosteady case. H. G. Hornung and J. R. Taylor 143

Transition from regular to Mach reflection of shock waves. Part 2. The steady-flow criterion. H. G. Hornung and M. L. Robinson 155

On the spectra of high-frequency wind waves. Hsien-Ta Liu and Jung-Tai Lin 165

Turbulent Couette flow between concentric cylinders at large Taylor numbers. G. P. Smith and A. A. Townsend 187

The boundary layer on a fixed sphere on the axis of an unbounded rotating fluid. S. C. R. Dennis and D. B. Ingham 219

The intrusion of a density current along the coast of a rotating fluid. Melvin E. Stern, John A. Whitehead and Bach-Lien Hua 237

Nonlinear self-excited acoustic oscillations within fixed boundaries. Jakob J. Keller 267

Patterns of convection in spherical shells. Part 2. F. H. Busse and N. Riahi 283

Flow separation in a rotating annulus with bottom topography. M. A. Page 303

Flow visualization of steady streaming in oscillatory flow through a bifurcating tube. F. R. Haselton and P. W. Scherer 315

Comparison of conditional sampling and averaging techniques in a turbulent boundary layer. C. S. Subramanian, S. Rajagopalan, R. A. Antonia and A. J. Chambers 335

The effects of surface roughness on the flow past circular cylinders at high Reynolds numbers. Y. Nakamura and Y. Tomonari 363

Strouhal numbers of rectangular cylinders. ATSUHI OKAJIMA 379

Measurements and predictions of fully developed turbulent flow in a simulated rod bundle. W. J. SEALE 399

Wind-induced growth of water waves. H. MITSUYASU and T. HONDA 425

Transonic shear flow in a three-dimensional channel. T. C. ADAMSON and M. SICHEL 443

Finite-amplitude interfacial waves in the presence of a current. PHILIP G. SAFFMAN and HENRY C. YUEN 459

Generalized vortex methods for free-surface flow problems. GREGORY R. BAKER, DANIEL I. MEIRON and STEVEN A. ORSZAG 477

Numerical solution for fully developed flow in heated curved tubes. J. PRUSA and L. S. YAO 503

A vortex-street model of the flow in the similarity region of a two-dimensional free turbulent jet. J. W. OLER and V. W. GOLDSCHMIDT 523
